Case Study Content Evaluation

During the class session, the instructor will break the class participants into teams of four. Each team will select a case provided by the instructor from cases in each care finance and be responsible for solving and presenting the solution in a written and oral format. The content of the paper and oral presentation should focus on:

Introduction – State the purpose and the importance of the case and provide an overview of the case.

Organization – Describe the type of financial environment the organization in the case is operating in using the relevant course terms, concepts, principles, theories and knowledge.

Questions, Methods, Tools, etc. Explain and analyze the case problem by applying the relevant course concepts, principles, theories and knowledge.

Accurate use of case information/lessons Apply the relevant course terms, concepts, principles, theories and knowledge to the information/recommendations for a solution and develop a team solution. Lessons learned for each analyzer from the case need to be identified.
